

Guidelines for onsite photography sessions:

- 1) Coordinate with your client on at least two good times for a photography session. Try to make the appointment about a week or two in advance. Either you or your client should be present during session but I *can* do photography sessions alone if a liability waiver is signed beforehand.
- 2) Schedule your appointment with Vortex Design.
- 3) Have your client do any staging necessary or possible before session.
 - Remove cars from driveway and close garage doors.
 - Straighten up house.
 - Remove clutter from all countertops.
 - Hide excess items (such as toys in living room) temporarily.

I can do some light staging onsite, but depending on the time involved, this may add to your total bill. Plus, I would need permission from your client to rearrange their possessions.
